

Flavor Burst™

CLR 2000TS TS CC80 Cooling Hood Assembly

Installation & Operation Instructions

The cooling hood assembly keeps the TS CC80 CrunchiCreme product ingredients at a manageable temperature when external temperatures may otherwise cause the ingredients to melt and clog the system. Use the following instructions to install and operate the cooling hood assembly and follow the operation tips to maximize the effectiveness of the system. For further information, contact your local distributor.

- 1 Ensure your TS CC80 system is equipped with a cooling hood arm assembly. If it is not, contact your local distributor to find out how to obtain one.

- 2 Open the base ring by removing one thumb screw and thumb nut. Place the ring around the mounting base modules so that the triangular notches rest between the containers. Install the thumbscrew and nut, then tighten to secure the assembly.

NOTE: ENSURE THE WEATHER STRIPS WITHIN THE BASE RING ARE FACING UPWARD.
