Mounting Bracket Anchor Plate Installation

The CW 178TS-D Mounting Bracket Anchor Plates **must** be installed under the freezer cap as shown in order to fully secure the Mounting Base Assembly to the freezer. DO NOT use adhesive tape to attach these brackets to the freezer. The assembly is too heavy for adhesives to hold and could fall off the freezer if the adhesive detaches. Slide the anchor plates under the freezer cap as far as it will go, up to the thumb knob post.
