

BASE-2S SYSTEM

Want to expand your existing Flavor Burst to an additional freezer spout? The Base 2S system allows you to connect another 8-flavor cabinet to a second spout or freezer, operated by your existing Flavor Burst Color Touch Panel. Add a set of syrups to the chocolate side of your twist machine, or offer more flavors from the second barrel of your FCB freezer. You can even add your base system to an entirely different freezer, offering Flavor Burst soft serve from one and Flavor Burst frozen beverages from another.

The **CTP BASE SS-2S** works with a soft-serve freezer and any Color Touch Panel-operated Flavor Burst syrup-stripping system.

The **CTP BASE BLD-2S** works with a soft-serve freezer and any Color Touch Panel-operated Flavor Blend syrup-blending system.

The **CTP BASE BEV-2S** works with a frozen beverage freezer and any Color Touch Panel-operated Flavor Burst syrup system.

The **CTP BASE FCB-2S** works with a frozen carbonated beverage (FCB) freezer and any Color Touch Panel-operated Flavor Burst syrup system.
