

Flavor Burst®

SYR 946 Syrup Connector Clamp

Installation

The SYR 946 Syrup Connector Clamp secures the Syrup Bag Adapter to the bag fitment. Simply slide the clamp over the black nut of the adapter and the grooved ring of the syrup bag fitment. The adapter spout should be able to move freely, while the clamp holds the rest of the adapter and the syrup bag fitment stationary. This will aid in preventing the fitment from loosening and causing syrup leakage. For more information, please contact your local distributor.
