<sup>1</sup> Serving size is based off a 5 oz serving of finished product, and when the serving includes 1 second of white cap time, and when base product dispenses from the freezer at a rate of 0.5 oz per second, and when the Flavor Burst syrup dispense rate is set at a level 4. For optimal blend and taste use a base product containing 5% butterfat or less.

<sup>2</sup> Servings per gallon do not reflect syrup lost when tubes and pumps are flushed during routine maintenance and cleaning procedures.
